Use case Analysis

Timely Deliveries

ACHIEVEMENTS

Axe Credit Portal – Al-Rajhi Bank

Al-Rajhi Bank credit application portal: Participated in discussions for scope and workshops with **AxeFinance** ACP and **Deloitte** under the leadership of **Accenture** (India) for new modules of CA, GLM, FI and TAT

JS BANK (Bahrain)

Successfully managed end-to-end project execution and QA for all feature phases, ensuring implementation of Trade Finance modules, including LC Initialization, UAM, Transfers, Bulk Transfers etc

Benefit Payment (CAS/PSP)

Managed the incorporation of new Benefit requirements for CAS and PSP beneficiaries and billers

Financial Matrix (HRM & ERP)

Explored available ERP systems (SAP B1, Oracle, Odoo) to finalize the features via comparison reports for next revamp version of application

Vision Bank (AGTB – Abu Dhabi)

Finalized the requirements of Phase 1 and Phase 2 for Account Services, UAM, Bulk Transfers etc

Digital Onboarding (Retail Banking)

DAON is an international service provider for biometrics and identity assurance. Lead the stability of DAON sdk upgradation for better identity for documents scanning and liveness for selfie.

Corporate Banking KFHB

Managed to deliver the Corporate Onboarding and post onboarding features within time

Finance Applications (Retail Banking)

Delivered the new finance applications with installment calculator including Auto Finance, Real Estate and Mazaya applications on both iOS and Android (native apps)

Joompa Fitness App (Malaysia)

Led the PMO and QA efforts for Joompa (Malaysia) – an AI Trainer App, managing project planning, execution, and quality assurance. Ensuring the accurate functionality with budget, scope and Time

Medicines POS System

Managed & Conducted market research and coordinated cross-functional teams to implement intuitive design improvements, enhancing user adoption and satisfaction

TECHNICAL SKILLS

Project Management

JIRA, MS Project, HP ALM, ASANA, Monday, Favro, Trello and ClickUp, MS Excel

Communication

Slack, MS Teams, Skype

Data & DB

MS SQL Server 2019, PostgreSQL, MS Access, SQLite, Table Plus, MySQL, LINQ, Entity Framework

QA Test / Automation

Cypress, Selenium, Appium, BrowserStack, Postman, JMeter, SoapUI, Vysor, Swagger, SonarQube

TECHNICAL SKILLS

Development

.Net Framework, VB.Net, C#, ASP.NET MVC, Microservices,, Web API, JavaScript, CSS, JAVA (basic), Python (basic), Angular/React JS (Familiar)

CICD - CI/CD

SonarQube, Jenkins, Maven, Nuget, NUnit, TFS, GIT

Designs & Prototyping

Figma, Adobe XD, Miro

Others

DevExpress Tools, Github, MS Visual Studio 2019, Visual Studio Code, R Studio and Eclipse, AWS S3 buckets, DAON (OCR Reader)

WORK EXPERIENCE

Project / QA Manager AION Digital

02/2022 - Present

Manama, Bahrain

Aion is a market leading FinTech that provides digital banking solutions

Upgrading Financial Middleware, Improved Digital Onboarding Process, Internet Banking Portal

- Review BRDs (Business Requirements Documents) and collaborates closely with team members, business analyst and department managers in an Agile environment to minimize gaps and ensure the development of features that fit the client needs.
- Sprint planning, Iteration kickoff/Retrospectives, Release Readiness, etc.). Used agile/SCRUM or standard software development processes.
- Expertise defining project goals, scope, approach, and overall task plan including providing clarity on critical path task.
- Conducted periodic reviews on project status with Project Team, Executive level management and clients.
- Create a sense of belonging and ownership among team members; assemble team with the right mix of skills; coach and motivate team members; delegate responsibility; promote mutual support and interaction

Project Manager InvoZone

09/2020 - 01/2022

Lahore, Pakistan

Invozone is a leading software development company that specializes in giving innovative solutions to healthcare, education, e-commerce, Fintech etc

Handled multiple projects single handed along with Al-Rajhi Bank

- Designed and executed the effective process for project management to ensure project delivery within agreed time and budget
- Managed 8 projects of varied levels at the same time by effective time management
- Coordinated with clients to identify arising concerns and addressing them in a timely manner with daily status reports and weekly demo(s)
- Improved Sprint planning by working closely between different teams via iteration kickoff, retrospective & scrum/standup meetings for realistic outcomes and risk analysis.
- Minimized functionality gaps in recent releases by reviewing the BRDs (Business Requirement Documents) closely with BA and development team.
- Reviewed & Analyzed acceptance criteria for completeness.

Senior SQA Engineer with APM Role Zasa Solutions (Pvt.) Ltd

10/2018 - 09/2020

Lahore, Pakistan

ITBIZSOFT is dynamic software house with variety of software products, customizable ERP, POS, HR and healthcare solutions

Achievements/Tasks

- Communicate with the direct clients, intermediaries, and other stakeholders in one to one and group session to collect project details and specification.
- Analyzed requirements, specifications, and user stories to create detailed, comprehensive, and well-structured test plans and test cases. Performed functional, regression, integration, user acceptance, and exploratory testing.
- Participated in live testing on staging to ensure proper integration and functioning provided quick support in case of hotfixes.
- Convert raw project specification into realistic, functional, and development requirements and prepare a feasibility report and submit it to client for approval.
- Provided alternative, best possible, cost effect and practical solution to client to develop a quality product to meet the market standards.
- Automated the stable modules of web by writing scripts in cypress with TestNG.

WORK EXPERIENCE

Test Automation Engineer

Modemetric Pvt Ltd

08/2016 - 10/2018

Lahore, Pakistan

Achievements/Tasks

- Transitioned from development to QA automation to minimize the manual testing efforts and to improving product quality through automation. Focused on designing, developing, and implementing automated test solutions that reduced manual effort and enhanced test coverage.
- Automated the web module of "BI - Predictive Analysis" by evaluating, important statistical formulas related to future prediction are implemented. (Mean, median standard deviation and other descriptive) with the help of Selenium
- Performed Web based testing including GUI Testing, Regression Testing, Integration Testing, and System Test, SIT, E2E and UAT testing
- Created dashboards in JIRA to track the progress on daily and weekly basis
- Analysed test reports generated via automation for daily sanity and weekly regression
- Scheduled demo sessions with client weekly to agile deliverables

Senior Software Engineer

Modemetric Pvt Ltd

08/2014 - 08/2016

Lahore, Pakistan

Achievements/Tasks

- Major responsibility Involved in Business requirement Analysis, Functional Requirement Analysis, Overall Design, Use-Case analysis, Initial Summary, and documentation for smooth development activities.
- Worked on module "Predictive Analysis" using .NET technologies and statistical formulas (mean, median, standard deviation etc.) with the help of R language
- Worked on DevStudio tool, which ease the application developers to define and edit (CRUD) various meta-data changes. All tables/entities in databases were being loaded in hierarchical (Master-Detailed) grid with all relationships, constraints and lookup(s) which made the tracking very easy and convenient.
- Worked on Export-Import routines is a tool which helped the configurator to export Meta of Lantern to clients.
- Performed analytical validations on Module "BI - Predictive Analysis" by evaluating, important statistical formulas related to future prediction are implemented. (Mean, median standard deviation and other descriptive)
- Participated in various meeting internal and with client for demonstrations and feedback sessions

Software Engineer

Modemetric Pvt Ltd

08/2012 - 08/2014

Lahore, Pakistan

Achievements/Tasks

- Developed Web and desktop application components of LANTERN (a product of Modemetric)
- Worked on module "Predictive Analysis" using dot net technologies and statistical formulas with the help of R language
- Worked on field selection module and period options which helps in report generation with predefined filters
- Worked on DevStudio, which used to perform CRUD option on meta data of system data and lookup

CERTIFICATES

PMI – Generative AI For Project Managers (11/2025)

Project Management Institute - PMI

PROGRAMMING IN HTML5 WITH JAVASCRIPT & CSS3
SPECIALIST (03/2013)

Certification Number 'E124-0240'

Introduction to Cypress (03/2025)

Test Automation University - Cert ID : c2797374

Web Engineering with PHP (09/2011)

University of Punjab (P.U.C.I.T) Lahore, Pakistan

Microsoft Certified Partner (MCP)

Python Programming (05/2025)
